Colour Matching Service Â

We offer a colour matching service for many of our custom printed and promotional items. For example we can work with the PantoneÂ® Colour Matching System (PMS) colour codes or the RGB colour model colours to ensure your colour requirement matches the product provided. As a guidance tool only we offer a guide on the link below. **Please note when viewing the colour guide that the shades are for approximate guidance only, as the colours may vary according to your screens resolution and other factors. You must use a PantoneÂ® Colour Formula Book to be sure the colour is correct.**
